

Identifying Key Words in the Buddhist Canon

ALEX AMIES

Independent Scholar & Strategic Cloud Engineer, Google

YASHUO DENG

PhD Student & ISHB Project Team Fellow, University of the West

Friday, October 25, 2019 2:00pm | ED 322 (ISHB)

Sponsored the Institute for the Study of Humanistic Buddhist (ISHB)

This presentation discusses approaches to keyword identification in Buddhist texts. Systematic approaches to keyword extraction with natural language processing methods are described as well as visualization techniques to help researchers identify keywords. Examples from the Heart Sūtra are explored followed by extension to the larger body of the Taishō Tripitaka. Potential future areas of application of the tools and methods will also be discussed..

Alex Amies is a Strategic Cloud Engineer at Google, independent Buddhist scholar, and part time volunteer for Fo Guang Shan. He is the creator of the <u>NTI</u> <u>Reader</u> and <u>HB Reader</u> and has published books and articles on cloud computing and Buddhist studies.

Yashuo Deng is a PhD student in Religious Studies and ISHB Project Team Fellow at University of the West. Her work focuses on Chinese Buddhist research through Digital Humanities, including Big Data, Al, mapping technology, network analysis,
